- A. Vehicle operators should ensure that they are fully aware of the contents of the vehicle handbook and have familiarised themselves with the vehicle before driving.
- B. The routine maintenance schedule in this handbook supersedes that laid out in the operating information/owners manual.
- C. All material contained in this publication is based on the latest information available at the time of publication approval. DaimlerChrysler reserves the right without notice to publish revisions at any time.

After you have read this manual, it should be stored in the vehicle for convenient reference and remain with the vehicle when sold.

ETHANOL IN PETROL

DaimlerChrysler recommends that your vehicle be operated on fuel containing no more than 10% ethanol. Use of fuel with an ethanol content higher than 10% may result in engine malfunction, starting and operating difficulties and materials degradation. These adverse effects could result in permanent damage to your vehicle. Purchasing your fuel from a reputable supplier may reduce the risk of exceeding this 10% limit and/or of receiving fuel with abnormal properties. It should also be noted that an increase in fuel consumption can be expected when using ethanol blended fuels, due to the lower energy content of ethanol.
